

AI App Developer Bootcamp

Five weeks taking non-technical trainees through AI app development, prototyping, and deployment, ending in a production-ready application

START DATE	DURATION	TOTAL HOURS	PER SEAT	TIMING
31 May 2026	5 weeks	60 hrs	KWD 950 / seat	5:00 – 8:45 PM

[OVERVIEW]

Five weeks of evenings turning non-technical professionals into AI app builders. Each attendee ships a deployed product on a custom domain, built with AI tools (Lovable, Replit, Supabase). Five modules: UI, API, Data, Security, Launch.

[WHAT YOU'LL WALK OUT WITH]

- Each attendee ships a deployed AI-powered app on a live custom domain
- Systems thinking: structure data flows and direct AI tools with technical clarity
- UI/UX design and prototyping with Stitch, v0, Lovable, and Replit
- API integration via REST + JSON, plus connecting to AI APIs through OpenRouter
- Backend data persistence and authentication via Supabase (auth, RLS, storage)
- Payment processing, analytics, and DNS to launch a production-ready MVP

[COHORT DATES]

May 31 – Jul 2, 2026	Next cohort
Jul 12 – Aug 13, 2026	Open
Aug 23 – Sep 24, 2026	Open
Oct 4 – Nov 5, 2026	Open
Nov 15 – Dec 17, 2026	Open

AI App Developer Bootcamp

MODULE 1: THE UI ARCHITECT

12 hrs

Module 1: The UI Architect

AI development tools (Lovable, Replit), UI/UX with Stitch and v0, component thinking, prompt engineering, deploy first live app.

MODULE 2: THE API CONNECTOR

12 hrs

Module 2: The API Connector

HTTP fundamentals, JSON, REST APIs, Postman testing, integrating an AI API via OpenRouter.

MODULE 3: THE DATA ARCHITECT

12 hrs

Module 3: The Data Architect

Relational database design, Supabase setup, server-side security, data-driven features.

MODULE 4: THE SECURITY ARCHITECT

12 hrs

Module 4: The Security Architect

Supabase Auth, user roles and RLS, AI safety and prompt-injection defenses.

MODULE 5: THE LAUNCH ARCHITECT

12 hrs

Module 5: The Launch Architect

Payment processing, analytics, error tracking, DNS, custom domain, ship a production MVP.

[WHO THIS IS FOR]

Built for non-technical professionals across operations, marketing, HR, and product who want to ship real digital products. No prior coding required, but you should arrive with a real idea and the willingness to put in the evenings.
