

Intro AI for Finance

AI-powered financial modeling, forecasting, and reporting automation in three days.

START DATE

19 Jul 2026

DURATION

3 days

TOTAL HOURS

18 hrs

PER SEAT

KWD 225 / seat

TIMING

8:00 AM – 2:00 PM[\[OVERVIEW \]](#)

Three days for finance teams on AI-powered modeling, forecasting, and reporting automation. Prompt engineering for financial analysis, LLM-assisted forecast models, automated month-end reporting. Each attendee leaves with a working model and a reporting prototype tailored to your company.

[\[WHAT YOU'LL WALK OUT WITH \]](#)

- Build an AI-assisted forecast model on real financials
- Automate month-end reporting workflows that previously took days
- Apply LLMs to commentary, variance analysis, and audit trails, safely
- Frame where AI helps in finance and where it actively hurts

[\[COHORT DATES \]](#)**July 19–21, 2026**[Next cohort](#)**Ready to enrol your team?**enterprise@joincoded.com · coded.kw

Intro AI for Finance

DAY 1

6 hrs

AI for Finance Foundations

AI landscape for finance teams, prompt engineering for financial analysis, AI-assisted Excel modeling, document analysis on contracts/statements/filings, AI-augmented variance analysis.

DAY 2

6 hrs

Forecasting & Reporting

AI-assisted forecasting techniques, building forecast models with Python + LLMs, automating board-ready reports and management commentary.

DAY 3

6 hrs

Audit, Risk & Capstone

AI for audit and compliance workflows, the risk and ethics frame, capstone forecast + reporting automation tied to the participant's own company data.

[WHO THIS IS FOR]

Finance managers, FP&A analysts, controllers, treasury, and corporate development. Excel financial modeling comfort required. Basic Python helpful but not required, we cover what you need. Maximum cohort size: 24.
