

DATA SCIENCE & ANALYSIS

AI & Data Science Bootcamp

Ten weeks of the full AI and data-science lifecycle, evenings only. Phase 1 (2 weeks) is a Python and analytics foundations sprint; Phase 2 (8 weeks) takes the cohort through ML, deep learning, generative AI, and a deployed capstone product.

DURATION	FORMAT	TIMING	PER SEAT
10 weeks 200 hrs total	Bootcamp In person	5:00 – 8:45 PM Sun–Thu	KWD 2,200 per seat · group rates

FOUNDATIONS

 Python

FIELDS

 Machine Learning Data Modeling

TOOLS

 Pandas scikit-learn PyTorch OpenAI Anthropic

What you'll walk out with

- ✓ Programming fluency in Python with Pandas, NumPy, and the scientific stack
- ✓ End-to-end ML lifecycle: framing, training, validating, deploying
- ✓ Modern AI: LLMs, RAG, single- and multi-agent systems, deployed live
- ✓ Business intelligence with PowerBI and Tableau plus production NLP and CV with transformers
- ✓ A deployed capstone AI product with documentation, demo, and stakeholder presentation

CURRICULUM

8 modules across 10 weeks

01

20 HRS 5 SESSIONS

Module 1: Python Foundations & Libraries

Python fundamentals, NumPy, Pandas for data cleaning, visualisation with Matplotlib / Seaborn / Plotly. Mini-project at end of week 2.

02

20 HRS 5 SESSIONS

Module 2: Data Preparation

API integration, web scraping with BeautifulSoup, merging datasets, data cleaning, RegEx text processing.

03

20 HRS 5 SESSIONS

Module 3: Exploratory Data Analysis

Data quality, descriptive statistics, regression, hypothesis testing, full EDA mini-project on Kaggle.

04

20 HRS 5 SESSIONS

Module 4: Machine Learning Foundations

ML workflow, model validation, under/overfitting, hyperparameter tuning. Submit a tuned model with graded score.

05

20 HRS 5 SESSIONS

Module 5: Applied Machine Learning

Evaluation metrics, feature engineering, ensembles, GPUs for ML, MLOps, time series, unsupervised, reinforcement learning.

06

20 HRS 5 SESSIONS

Module 6: Deep Learning

Neural networks, NLP transfer learning, Hugging Face, fine-tuning, computer vision with CNNs and transformers.

07

20 HRS 5 SESSIONS

Module 7: Generative AI & AI Agents

Prompt engineering, RAG, agent foundations, single- and multi-agent systems, end-to-end AI app on Streamlit / Gradio / Lovable.

08

40 HRS 5 SESSIONS

Module 8: Capstone Project

Live, deployed AI product with documentation and demo. Enterprise-sponsored capstones available.

COHORTS 2026

4 open cohorts

AT A GLANCE

Logistics & enrollment

DURATION	10 weeks (200 hours)
FORMAT	Bootcamp · In person
SCHEDULE	Sundays to Thursdays · 5:00–8:45 PM · 5 evenings/week
LOCATION	CODED Campus, Free Trade Zone, Kuwait
PER SEAT	KWD 2,200 · group rates available
PREREQUISITES	Some Python helpful, foundations covered
CLASSROOM	Evening cohort, CODED Campus

Who this is for

For technical professionals and motivated mid-level analysts who want to become data scientists. Comfort with one programming language helps; we cover Python from day one. Phase 2 enrollment requires passing Phase 1.

Frequently asked

Can our company sponsor a capstone problem?

Yes. Enterprise-sponsored capstones are encouraged, we'll coordinate scoping with your team during Phase 2.

Are the discounts conditional?

Phase 2 discounts apply to groups of 2+ from the same company, and only after the candidate passes Phase 1.

Ready to enrol your team?

We'll come back with seat confirmation, the next available cohort, and the invoice.
