

[AGENTIC AI]

NVIDIA GenAI & LLM Certification Program

Five days of NVIDIA-aligned certification on large language models and generative AI. Hands-on with NIM, NeMo, and Triton across the full LLM lifecycle. Each attendee leaves with a portfolio project on real data plus the certification voucher.

DURATION	FORMAT	TIMING	PER SEAT
1 week (5 days) 40 hrs total	Workshop In person	8:00 AM – 4:00 PM	KWD 1,450 per seat

FIELDS

Agentic AI

RAG

TOOLS

NVIDIA

PyTorch

Hugging Face

OpenAI

Anthropic

What you'll walk out with

- ✓ NVIDIA-aligned readiness on GenAI and LLM specialist content
- ✓ Hands-on practice across NIM, NeMo, and Triton
- ✓ A portfolio project applying NVIDIA's GenAI tooling to a real use case
- ✓ Certification voucher in hand at the end of the week

[\[CURRICULUM \]](#)

5 modules across 1 week (5 days)

01

8 HRS 1 SESSIONS

Day 1, Fundamentals of Deep Learning

Mechanics of deep learning, training a first computer-vision model, CNNs for image recognition, data augmentation and transfer learning with PyTorch.

02

8 HRS 1 SESSIONS

Day 2, Accelerated Data Science

GPU-accelerated data manipulation (cuDF, pandas, Polars, Dask), ML with cuML, XGBoost on GPUs, graph analytics with cuGraph, population-scale data analysis.

03

8 HRS 1 SESSIONS

Day 3, Transformer-Based NLP Applications

Transformers as the foundation of modern LLMs, pre-trained LLMs for classification, NER, QA, summarisation, author attribution and chatbot building.

04

8 HRS 1 SESSIONS

Day 4, LLM Apps with Prompt Engineering

Prompt engineering principles for production, designing reliable LLM prompts, hands-on LLM application patterns.

05

8 HRS 1 SESSIONS

Day 5, Rapid LLM Application Development

End-to-end LLM application development, deployment patterns and integration, capstone build, and certification exam prep.

Logistics & enrollment

DURATION	1 week (5 days) (40 hours)
FORMAT	Workshop · In person
SCHEDULE	Morning shift, 8am–4pm, five consecutive days
LOCATION	CODED Campus, Free Trade Zone, Kuwait
PER SEAT	KWD 1,450
PREREQUISITES	Python proficiency required
CLASSROOM	Morning Big O (35 seats)

Who this is for

Engineers, ML engineers, and senior IC roles building or operating GenAI systems. Prerequisites: Python proficiency, familiarity with deep-learning fundamentals, comfort with the command line. Maximum cohort size: 35.

Frequently asked

Is the certification voucher included?

Yes. Voucher is included in the seat fee.

GPU requirements?

We provide cloud GPU access for the workshop. Local GPU is optional.

Ready to enrol your team?

We'll come back with seat confirmation, the next available cohort, and the invoice.
